MAISON & OBJET OUTDOOR INDOOR
HALL 7A STAND B46

PREMIERE IN EUROPE

The Swedish designer duo Erik Nyberg and Gustav Ström proudly presents the unique leisure creation WAVE at MAISON & OBJET OUTDOOR INDOOR in Paris September 5-9, 2008.

INNOVATIVE DESIGN

WAVE is no less than an exclusive innovation in leisure design, forming both a sculpture and an inviting and luxurious outdoor furniture, reminding of a hammock but yet beyond compare.

MATERIALS & DIMENSIONS

The materials in WAVE consist of electro-polished stainless steel and perforated fabric, one type for the upper roof section, and another for the lying section. The fabric is semi-transparent, and at the same time it offers protection from the sun, blocking 86 percent of the sun's rays.

The idea is to convey the feeling of lying underneath the canopy of a tree, surrounded by a defined, natural space.

LENGTH: 3700 mm, HEIGHT: 2900 mm, WIDTH: 2500 mm
